History

Where we started

ACCORD was founded in 1997 as a fine furniture factory in the countryside of southern Brazil, from the dream of three brothers working together with the legacy of the family: carpentry. In the early 2000s we were already recognized for the quality of our products and services, but as restless minds, we decided to look for something new. In 2005, we translated all our know-how to harmonize wood with light, thus resulting in ACCORD Lighting.

Where we are

Over the years and as a result of our hard work, we have become one of the most respected Brazilian companies in the industry of decorative lighting. Our lamps are used in the most relevant interior design projects and decoration events in the country, as well as in scenarios of the main Brazilian television networks. We have in our customer portfolio the best specialized lighting and decoration retailers of Brazil and our lamps are loved by professionals who have presented us with the most beautiful projects. Since 2014 we have been selling our products around the world with representatives and distributors in 9 countries from Latin America, North America and Middle East, which has made ACCORD Lighting an internationally recognized brand.

Where we're going

Through all these years, with the fast evolution of technology, it has been our challenge to manufacture high quality luminaires without losing the handcrafting techniques taught by our founders. Today our production process combines high-tech equipments and technology with the irreplaceable manual work, resulting in the best wooden luminaires of the World. Our dream is to bring light and sophistication all over the world — one lamp at a time

Passion & Technology

Everything started from the family tradition of woodworking, giving it the time and the attention to turn it into something with value. Our production process involves the meticulous work of at least 30 of our artisans in the production of one single piece. By aligning the handcraft techniques taught by our founders with technology, we find the perfect balance between tradition and innovation.

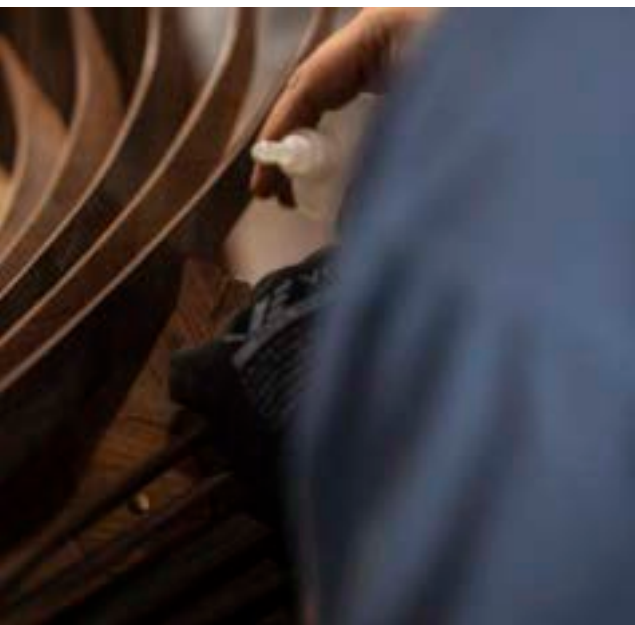

Since 1997

24 Years being passionate about wood, we always believe in the timeless design and in the beauty of the craftsmanship to create durable and sophisticated wooden products.

sophistication

Finishing options

We work with the highest quality materials, from the leading sustainable suppliers on the market. These materials allow us to guarantee a high quality product while we seek to innovate in forms and processes without losing the essence of our craft techniques.

Wood in its most varied forms is our base raw material. We use natural wood veneers and MDF from proven and certified sources for high durability and easy maintenance.

All our luminaires can be lacquered or laminated in any of the finishes below.

The finishes exemplified here are representative and may suffer variations from the original item. Please use them only as a guide for selecting colors. Physical samples are available through our partners or by contacting our sales team. Due to natural variations in texture, grain patterns and nodal marks, color tones of natural wood veneers will differ. These are part of the inherent beauty of the material and cannot be regarded as defects.

Custom details & Design flexibility

In addition to all the available options we also offer the Exclusive Manufacture service so you can add your personality to the product that you acquired, having something unique. Contact our sales team to find out your customization options.

25 - IREDESCENT WHITE

09 - LOURO FREIJÓ

Quality

One of the reasons why Accord has become a national and international reference is the quality of its products. We work with the best materials and suppliers on the market, which allows us to guarantee an impeccable final result.

Wood

All of our woods carry the FSC certification, this means that they are harvested by responsible and sustainable sources. The wood grain is different in each fixture, this means that the fixtures that you own are unique

Lacquers

Our paints come from Italy from extremely high quality manufacturers, they supply us with a variety of options that are standard in our offerings, but they also allow us to customize any color our clients may want within a short period of time. Low VOC [volatile organic compounds]

Crystals

Our Crystal supplier is Asfour, they provide us with extremely high quality Crystals from Egypt.

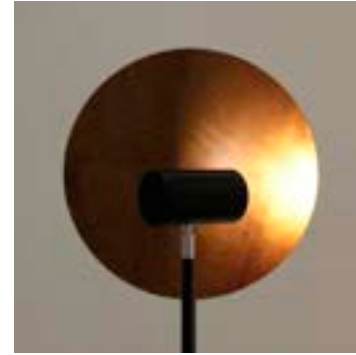

Acrylic

We use high quality acrylic diffusers in our fixtures, this ensures a good amount of lighting distribution. Our acrylics are reliable, stainless and easy to maintain.

Innovative Design

The result of all our effort, attention, care and love deposited in our products, is our DNA, Light, wood and sophistication

Designers

Bruno Diego Felipe

Aiming to achieve an identity in its products' design, in 2017 Accord founded its own design studio, called Studio ACCORD. Always looking for the protagonism of wood enhanced by light, the creation of products is always the result of seeking for the elegance of timeless and singular design.

Architect and Urbanist graduated in the Federal University of Fronteira Sul (UFFS) and specialist in furniture and interior design, Bruno Felipe is lead designer at Studio Accord. Born in the countryside of southern Brazil in a traditional family of Italian immigrants, he learned very early about the importance of nature, culture and spirituality. Beyond ensuring the materialization of the Accord DNA in each new product, he still seeks for authenticity, expressiveness and sustainability in his works, through an emotional and essentialist approach.

Fred Cohen

Based in Los Angeles, Fred reflects his ability to simplify ideas and express emotions through the use of simple materials and technology. Cohen always wanted to be more involved with designs on a personal level. His interests led him to major in furniture design, which that gave you a new path to a variety of furniture companies and home decor products. "My designs are reflections of the environment around me. Much of my inspiration comes from Los Angeles, which is a great center for art, architecture, music, cinema and fashion. Sometimes looking back in time allows me to free my imagination and see things in a new way. Imagination creates reality."

Daniela Ferro and Alexandre Rocha

Daniela Ferro is a product designer, partner and coordinator of Asa Design. Daniela designs pieces aimed at high end market decoration, and that are manufactured within standards of excellence and loyalty to the project.

Alexandre Rocha is a designer. He participated in the Mission Brazilian Designers in the United Kingdom, where he improved his vision of design as a business tool.

Asa Design is a sixteen year old design office that has a strong presence in the furniture and objects market decoration.

Adriana Sypniewski

Head of Gray House Lighting for 30 years, Adriana Sypniewski has always focused on exclusive designs, thus differentiating customers' projects. For each piece created, I always start with the light effect, and then go to the drawing itself. I like the mix of materials. Always studying, to be able to feel and pass the emotions and sensations that light transmits in its essence."

" I try to find the right balance between emotion, beauty and functionality. My mission is to convey feelings through design, applying it to everyday reality. " Sara Bevilaqua is passionate about lines, shapes, colors and emotions. She is an architect, designer and interior designs specialist.

Since 2004, she has sought to create fixtures and environments that convey personality and beauty with results capable of moving and being correlated with her visual and intuitive experiences. The tireless search for knowledge and new perspectives under the world, add unique and peculiar lines to each drawing.
