MIKADO
PAGINA 36

Più il mondo diventa complesso più dobbiamo essere creativi nell'affrontare sfide, in ogni ambito della nostra quotidianità.

Il gioco può ispirare la creatività. Il colore può influenzare lo spazio toccando l'emotività. La luce può disegnare le forme, accompagnando ogni momento della giornata, in modo peculiare, assecondando la nostra natura e le nostre necessità.

The more the world becomes complex, the more creative we need to be in the way we face its challenges and in every area of our daily life. Play can inspire creativity.

Color can affect space by touching us emotionally. Light can draw shapes during every moment of the day, in a peculiar way, following our nature and our needs.

TOO-BÒ

TOO-BÒ

TOO-BÒ un gioco di parole e un gioco di luce, un'idea senza forma ma con la sua forte identità e personalità.

Materia da plasmare secondo il proprio gusto e una sfida per arredare con una forma luminosa sempre diversa divertendosi a disegnare la luce.

TOO-BÒ a play on words and a play on light, an idea without form but with its own strong identity and personality.

Material to be shaped according to one's taste and a challenge to furnish with an ever-changing luminous form having fun designing light.

LINE ARCHITECTURE

La luce è un elemento naturale base, fondamentale per la nostra vita e il nostro benessere psicofisico. Nonostante la sua costante presenza, spesso passa inosservata. Eppure c'è.

Il sistema LINE nella sua semplicità e nel suo minimalismo è proprio questo, una sorgente di luce quasi invisibile, eterea ma reale.

Leggeri raggi di luce che evidenziano le geometrie architettoniche senza invaderle, un tratto pittorico più che uno strumento, per valorizzare gli spazi del nostro vivere.

Le molteplici fotometrie disponibili sono un mezzo indispensabile per il raggiungimento dell'obiettivo emozionale di LINE.

Light is a basic natural element, essential to our life and psychophysical well-being. Despite its constant presence, it often goes unnoticed.

Yet, it is there. The LINE system, in its simplicity and minimalism, is just that: an almost invisible light source, ethereal but real.

Thin light rays that highlight the architectural geometries without invading them, a pictorial trait rather than a tool, to enhance the spaces of our life. The various photometries available are an indispensable means of achieving LINE's emotional goal.

MIKADO

MIKADO

Architettura e illuminazione si fondono in un tutt'uno nell'ambiente che ci accoglie. MIKADO è elemento lineare, non invasivo, che ricerca l'essenzialità delle linee pulite e minimali, la forza delle geometrie. Tutto questo rende MIKADO un elemento che valorizza i nostri ambienti personali, donando benessere e comfort ambientale grazie anche alla modularità d'illuminazione "Bianco dinamico".

La soluzione d'illuminazione "RGB", invece, fa di MIKADO un prodotto distintivo e ancor più personalizzabile per i nostri ambienti personali, giocando con le molteplici sfumature di colore della luce.

L'essenzialità delle linee pulite e minimali, con la forza delle geometrie, rendono MIKADO un elemento che valorizza i nostri ambienti perso

Architecture and lighting merge into one in an environment that welcomes us. Mikado is a linear, non-invasive element that seeks essentiality in clean and minimal lines and in geometries.

For these reasons, MIKADO is an element that enhances our personal environments, while creating occupant well-being and environmental comfort. This also thanks to the modularity of "dynamic white" lighting.

The "RGB" lighting solution, on the other hand, makes MIKADO a distinctive and even more customizable product, able to play with the multiple color shades of the light.

The essentiality of clean and minimal lines and the power of geometries make MIKADO an element that enhances our personal environments.
