GALAVANT CORDLESS TABLE LAMP
12"h x 6"dia

Our cordless lamps charge using two different technologies. Nine feature a rechargeable base (the whole lamp fits on the charger unit), while six have a rechargeable lightbulb (only the bulb itself is charged). All of the lamps in this line include the charger, as well as the electrical block and USB-C cable. Each lamp is fully dimmable with a touch of a button. Our lamps are expected to operate for up to 15 hours on a single charge.
