Stylish Designs in Motion

From modern-inspired styles to traditional, classic looks, our ceiling fans combine both style and function with technology. These trendy, all-in-one appliances are perfect for opening up a space or enhancing a smaller area while delivering light, circulation, and comfort to any room. Come look inside to see what new and innovative ceiling fans we have in store for you and your space.

Symbol Guide & Visual Index

Integrated LED Incorporates LEDs directly into the ceiling fan.

Dimmable Is dimmable when paired with our wall control or handheld remote.

CCT Selectable Choose the ideal Correlated Color Temperature (CCT) for the fan's light – 3,000K for warm or 5,000K for bright lighting.

AC Motor Simple to install, pairs to controls, and is compatible with a variety of optional accessories.

DC Motor Lightweight, quieter, and uses up to 70% less electricity than an AC motor ceiling fan.

Reversible Blades Offers two different blade finish options to select from.

Energy Star® Trusted, government-backed symbol for energy-efficient products.

Damp Rated Designed for use in covered outdoor areas or indoor areas where the fan may be exposed to high humidity or light moisture. Not intended for uncovered use where it will be directly exposed to water.

Wet Rated Designed for outdoor use. Waterproof, can be used in high-moisture areas and direct exposure to rain/water.

Weather+™ Designed to withstand wet rated weather conditions, plus combat the effect of certain environmental factors, such as saltwater spray and the impact from UV rays.

START WITH YOUR

Location

Knowing where you would like to install your ceiling fan plays a big role in what type of rating you should select.

Outdoor Fans

Perfect for environments with moisture.

- D Damp Rated Fans:** Fixtures must be used under cover and not directly exposed to the elements. An example of this would be a covered porch or patio.
- W Wet Rated Fans:** Fixtures can be exposed to direct precipitation when installed on structures such as pergolas or open porches.
- W+ Weather+™ Rated Fans:** Designed to withstand wet rated weather conditions and combat the effect of certain environmental factors such as sun, rain, and saltwater spray. Weather+ ceiling fans are low-corrosion and UV fade-resistant, making these fans ideal for coastal areas. These fans are tested for 1000+ hours and feature a 3-year finish performance warranty.

Indoor Fans

Designed for dry environments such as living rooms, bedrooms, and offices.

Dry Rated Fans: Must always be used indoors.

Damp Rated, Wet Rated, and Weather+™ Rated Fans can be used indoors if you love their style, especially in areas with higher humidity like bathrooms, kitchens, or sunrooms.

D Damp Rated

W Wet Rated

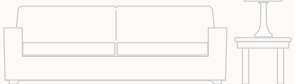

W+ Weather+™

Size Options

SELECTING THE RIGHT SIZE FAN

Picking the size of a ceiling fan is easier than you think. Just measure the room, wall-to-wall, for the length and width. Then multiply the length and width together to get the square footage of the room. Once you have this, you will be able to find the blade size that works best for your space.

	SPACE	BLADE SWEEP	CFM ON HIGH
 90 SQ. FT. OR LESS 	90 SQ. FT. OR LESS <ul style="list-style-type: none"> • Small bedroom • Office • Galley kitchen 	15" - 42"	2,500-3,500 for maximum cooling
 90-100 SQ. FT. 	90-100 SQ. FT. <ul style="list-style-type: none"> • Over a kitchen table • Large walk-in closet • Laundry room • Small screened-in porch 	48" - 48"	3,500-4,500 for maximum cooling
 100-150 SQ. FT. 	100-150 SQ. FT. <ul style="list-style-type: none"> • Bedroom • Larger kitchen • Formal dining room • Outdoor applications 	50" - 54"	4,500-5,500 for maximum cooling
 150-300 SQ. FT. 	150-300 SQ. FT. <ul style="list-style-type: none"> • Great room • Primary bedroom • Large outdoor patio • Outdoor applications 	56" - 70"	5,500-10,000 for maximum cooling
 300+ SQ. FT. 	300+ SQ. FT. <ul style="list-style-type: none"> • Lobbies • Restaurants • Large open spaces 	70"+ or multiple fans	over 10,000 for maximum cooling

CFM (cubic feet per minute of recorded airflow) - the higher the reading the more air is moved per minute.

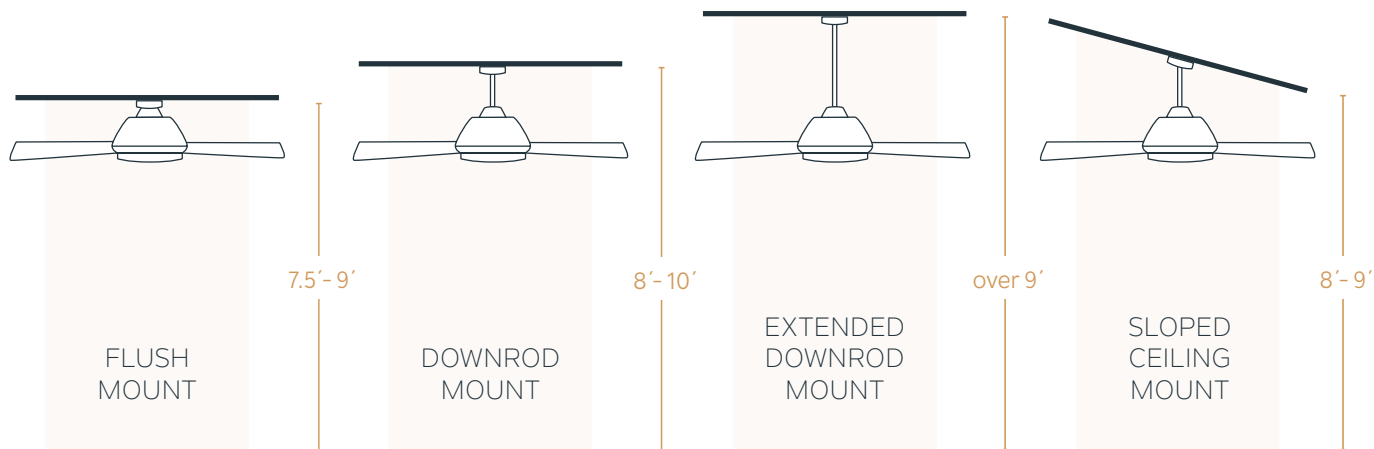

Special Considerations

- Have a room that's larger than 300 sq feet, consider an oversized fan or multiple small fans.
- If your ceiling is higher than 8 or 9 feet or a vaulted ceiling, you will likely want a longer downrod (sold separately) and might consider an oversized fan.
- Residential fans should be installed with a minimum clearance of 7-feet under the blades.
- Industrial-rated fans with high RPMs should be installed with a minimum of 10 feet under the blades.

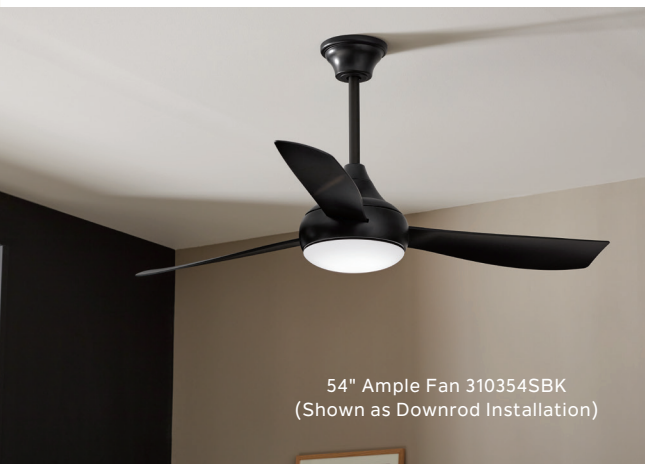

RPM (revolutions per minute) - the number of times the fan blade makes a complete rotation each minute

Mounting Options for Varying Ceiling Heights

When it comes to ceiling fans there are a couple of different ways to mount the fan. Understanding these options will help you select the right mounting type for your space.

A downrod coupler 337007 can be used to further extend the length of the downrod. For applications above 30° slope, utilize our 60° Slope Adapter Kit 337005 on page 237.

Dual Mount Ceiling Fan

A dual mount ceiling fan, also known as low ceiling adaptable, can be installed as either a flush mount or with a downrod and includes hardware for both installation options.

Flush Mount

- Ideal for low ceilings
- Also referred to as hugger fans
- Fan should hang no less than 7 ft. from the ground

Downrod

- Ideal for 9-10 ft. ceilings
- Fan should hang no less than 7 ft. from the ground

HOW MUCH IS ENOUGH

Airflow

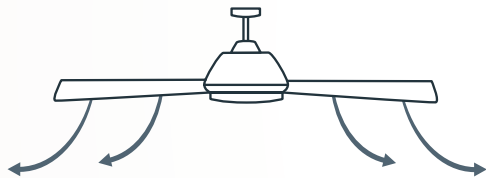

Ceiling fans are rated by airflow and airflow efficiency. The higher the airflow (cubic feet per minute), the more air the fan moves, and the better the airflow efficiency.

Airflow
Cubic Ft. Per Minute on High

6203

Airflow is measured in Cubic Feet Per Minute (CFM) – a U.S. Government-mandated standard.

- The higher the airflow number, the more air the fan is circulating.

Summer Rotation

COUNTER-CLOCKWISE

Blades push cool air down for a refreshing breeze

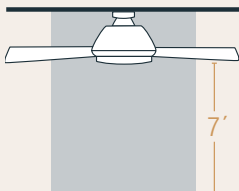

Winter Rotation

CLOCKWISE

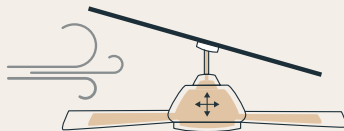

Blades pull cool air up while recirculating warm air back down into your space

Factors that Impact Airflow

Indoor

- Fan blades must be at least 7 feet from the floor
- For tall ceilings, use a downrod or a fan with higher CFMs

Outdoor

- Use a larger fan or one with higher CFMs
- Add a sloped ceiling kit for stability

Airflow Considerations

For Flush Mounts

- Flush mount fans have less air to pull from
- This results in lower CFMs than fans with downrods

For Fans With a Downrod

- Downrods extend fans from the ceiling for better air circulation
- This improves airflow and cooling sensation

CFM (cubic feet per minute of recorded airflow) - the higher the reading the more air is moved per minute.

CHOOSING THE RIGHT Fan Motor

When selecting a ceiling fan, it is essential to understand the difference between AC and DC motors. AC motor ceiling fans are more common, but a DC motor uses less electricity and is usually quieter. See below for additional factors to consider when choosing between the two motor types.

AC Fan Motor **AC**

- 3 forward speeds
- Reverse & motor off
- Light on/off with full range dimming

Tried and True

- Common for residential and multi-room applications
- Simple to install and maintain
- Can install multiple on the same circuit
- Easily pairs to its control or accessory controls
- Works with an array of accessories: light kits, controls, accessories

Commercial

(Hotels, Apartments, Multiple Fan Applications)

AC motor fans work best in commercial settings

- You can install more than two AC fans on a circuit
- AC motor control frequency options allow for more unique codes per fan, which helps avoid frequency interference changing in a fan with the same code in another room.

DC Fan Motor **DC**

- 6 forward speeds
- Reverse & motor off
- Light on/off with full range dimming

Light and Efficient

- Common for residential
- Light in weight to ease install
- Whisper quiet
- Energy efficient internal transformer uses 70% less energy
- Efficient power usage results in energy cost savings

Residential

(Single Family)

AC and DC motors fans work well in residential settings

- Keep in mind that if you are installing more than one DC fan in a home, you might want to select an AC motor to allow for more unique codes per fan and avoid frequency interference in the home.

UNDERSTANDING

Light

If you want to lighten up your space while making comfort a breeze, choose a fan with a light or add a light kit. Here are some tips to help you get started.

Integrated LED & Accessory Lighting

What does integrated LED mean?

Integrated LED means the lighting module is built directly into the fan. This all-in-one design eliminates the need for separate bulbs, offering ambient light combined with the fan's comfort and style.

LED Light Kit Options

We offer two LED lighting options beyond integrated designs:

1. Included LED Light Kit

Many fans come with a built-in light kit (e.g., bowl or fitter) that includes LED bulbs.

2. Optional LED Light Kit Accessory

Some fans are compatible with separately purchased light kits for added lighting and style.

Universal LED Light Kit Accessory

Our universal light kits are compatible with any fan finish, feature adjustable color temperature (3000K & 5000K), and are available in squared or rounded dome designs.

Color & Brightness

Choosing the right LED fan or bulb involves two key factors:

1. Color Correlated Temperature (CCT)

Measured in Kelvins (K), this determines whether the light appears warm or cool.

2. Brightness (Lumens)

Indicates how bright the light will be.

2700K a warmer light—closer to incandescent

3000K trends warm, but optically closer to a pure white

4000K trends cooler, but perceived as a bright white

5000K is cool, perceived often as having a blue hue

Color Rendering Index (CRI)

CRI measures how accurately a light source displays colors. A CRI of 90+ makes colors look vibrant and true-to-life, while a CRI below 80 can make them appear dull.

CRI 70

CRI 80

CRI 90

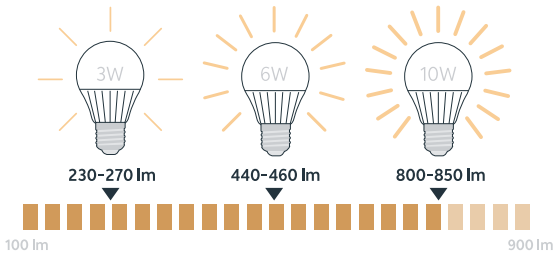

CRI 97

Dimmability

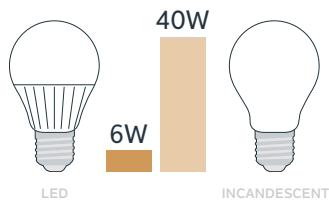

Depending on your need for the space, the light output you need can vary. If you're having a cozy night in, you may need less light, while activities like family game night or homework time may need more. This is why dimmability is so important. All of our LED fans with a wall control or handheld remote are dimmable, allowing you to find the ideal light for every occasion.

A Little Bit About Lumens

When looking at an LED light, you will see the light output measured in lumens. But what exactly is a lumen? And what exactly is a watt?

Lumens (lm) measures how bright the light is. The higher the number, the brighter the light.

Watts (W) measures how much energy a light uses. The lower the number, the less energy it consumes.

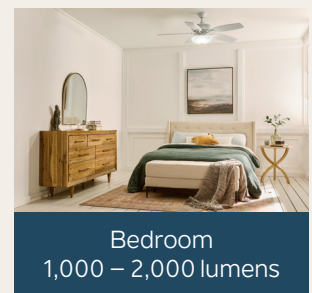

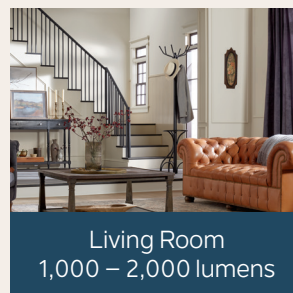

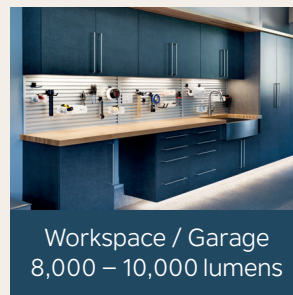

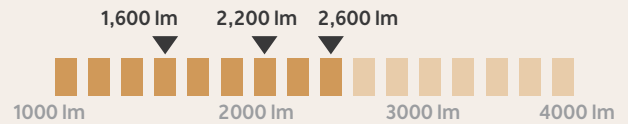

Efficiency (lm/W) measures how well a light converts energy into brightness. The higher the number, the more light you get per watt used.

How Many Lumens Do You Need?

Knowing the size of your room will help determine how many lumens you'll need. Above are general guidelines to help you gauge.

The majority of our ceiling fans have around 1,600 lumen output. We also offer a select number of fans that have around 2,200 lumen output.

To achieve maximum room lighting potential, consider light layering with downlights or LED tape lights.

It's important to note these are general guidelines and your room might require more lumens. For instance, if your room has darker walls and high ceilings, you may need additional lumens for desired illumination.

CEILING FAN

Control Options

Pull Chain - built into the switch housing, these ceiling fans are easy to operate – with just a pull of the chain you can adjust the speed and turn the light on and off.

Wall Control - connects to the room's wall switch box and offers the ability to adjust the fan's speed, dimming capabilities, and full-function models can even reverse the direction of the fan rotation (blade reversal).

Handheld Remote - offering more mobility, you can place this remote throughout the room or on the wall. Battery operated, this remote offers the ability to adjust the fan's speed, dimming capabilities, and rotation direction.

Wall and handheld controls that come with our fans are white. We offer a variety of optional finish accessories to fit your style and décor.

Ceiling Fans with CCT Selectable Lighting

Some of our fans and light fixtures feature a built-in switch to easily adjust color temperature.

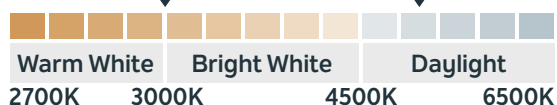

Choose warm or cool settings to create the perfect ambiance – no tools needed!

3000K or 5000K

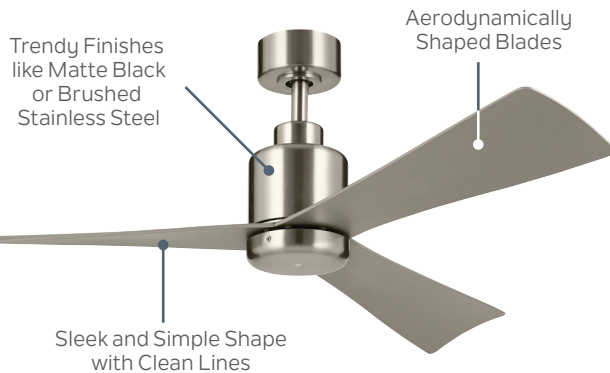

Kelvin (K) Color Temperature is the color of the light source.

FIND YOUR Style

From modern and traditional to art deco and vintage-inspired, we offer ceiling fans in a variety of styles to fit an assortment of spaces and décors. Need some inspiration? Check out the styles below:

Modern

Modern style highlights simplified forms and finds beauty in purity of design.

Its softer color palette defines the modern look. Warm neutrals balance minimalist materials for an aesthetic that's undeniably current. Bold forms and sculptural silhouettes make a stunning statement in this evolved style. Modern leans toward clean and minimal designs, focusing on the beauty of simplicity.

Distinctive Styles

This curated collection of styles are unmistakably distinct.

Inspired by environmental surroundings and encompassing a range of lifestyle looks, Distinctive Styles shine. From industrial to farmhouse to coastal and boho, intricate, particular detailing gives these design styles their own distinguishable characteristics.

- Industrial
- Cottagecore / Homestead
- Coastal
- Farmhouse
- Lodge / rustic
- Global / Boho

Retro Inspired

What's old is new again with retro-inspired styles.

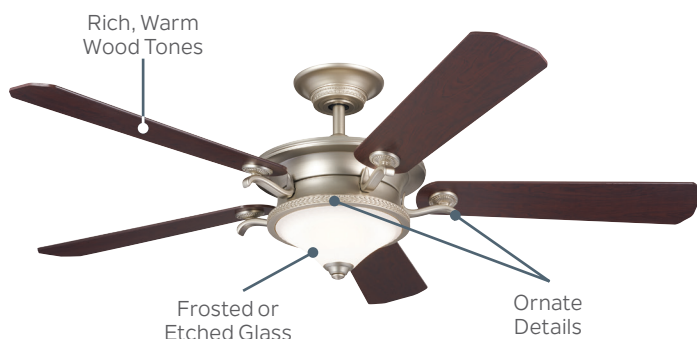

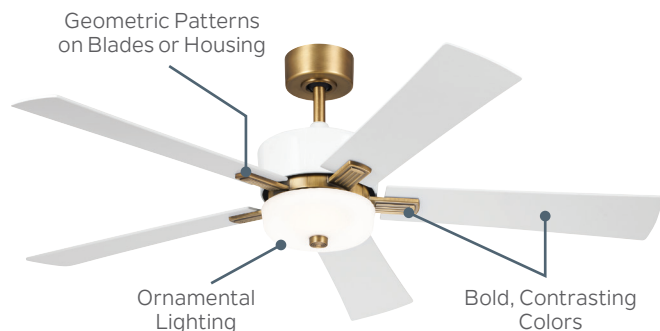

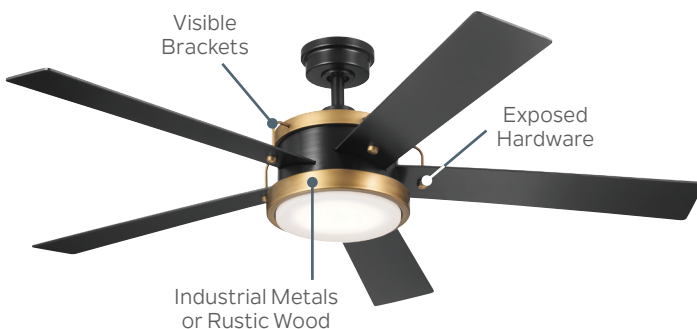

Evolved classics with modern and luxe influences, the retro look is reviving iconic design details. Spanning from the 1920s to the 1970s, retro encompasses multiple styles, including mid-century, arts and crafts, and Art Deco.

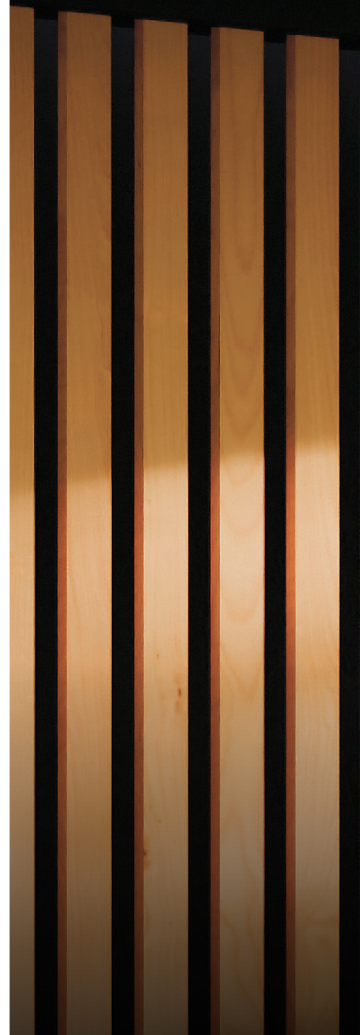

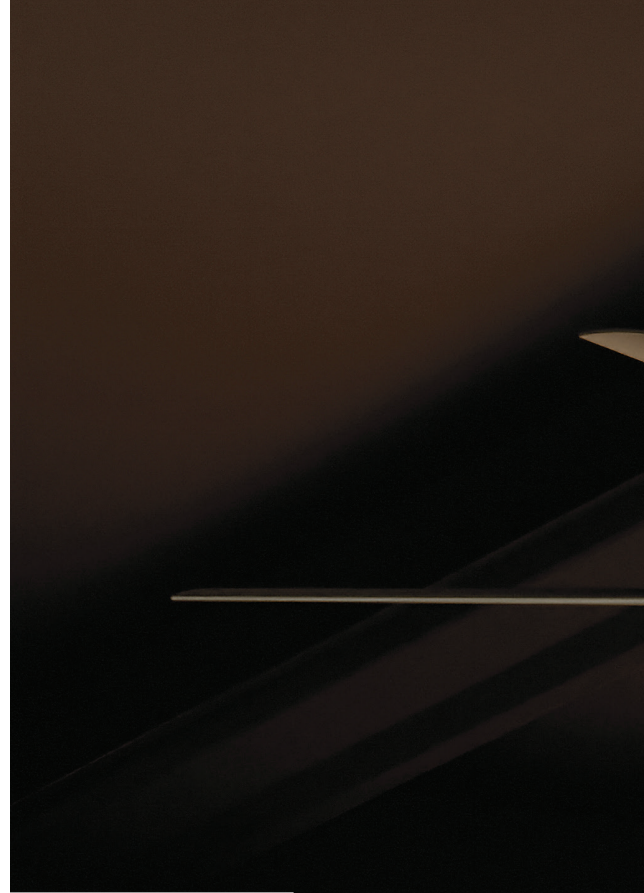

- Mid-Century Modern
- Art Deco
- Arts & Crafts

Traditional

Traditional style is just what you expect—familiar, warm and classic.

This style's inspiration is rooted in character and comfort. Traditional style appeals to the mainstream because it's such a timeless look, which means it's at home in almost any space. It can serve as a backdrop for accents from almost any other look, allowing it to be as flexible as it is beautiful.

Featured Ceiling Fan Collections

Fans so stylish, they'll blow you away.

Whether you are looking for all natural wood blades or a ceiling fan that can take on the elements of Mother Nature, we have you covered. Our newest collections feature gentle curves, modern design and correlated color temperature (CCT) switch light kits which allows you to change the light color between 3000K to 5000K during installation. Inside or out, these collections are sure to get noticed.

NEW

Mylo

The Mylo ceiling fan collection features soft curves and smooth, sculptural blades that presents a clean, modern look. These elegantly contoured fans are available in two types: damp rated with natural wood blades or Weather+ for harsher wet rated environments. Offering a variety of finishes and sizes, the Mylo collection is the perfect addition inside and out.

View the Mylo Weather+™ models on pages 46-51.

Weather+™ Fans

For coastal environments.

Designed to withstand wet rated weather conditions and combat the effect of certain environmental factors such as sun, rain, and saltwater spray. Weather+ ceiling fans are low-corrosion and UV fade-resistant, making these fans ideal for coastal areas.

NEW

Mylo Weather+TM

The Mylo ceiling fan collection features soft curves and smooth, sculptural blades that presents a clean, modern look. These elegantly contoured fans are available in two types: damp rated with natural wood blades or Weather+ for harsher wet rated environments. Offering a variety of finishes and sizes, the Mylo collection is the perfect addition inside and out.

View the Mylo damp rated models on pages 24-33.

REVIEWS

60" Kichler Surrey Weather+™ Ceiling Fan

"I absolutely love this fan! It provides a great deal of air circulation on hot humid days. This fan is very well made and a very nice addition to my room. My friends and family rave about how beautiful it looks and works. They want to purchase one for themselves...If you want a well made product, get one for yourself you wont regret it."

- Pat66

Specialty Fans

Fans are a beautiful way to add comfort to your space, but each space has a unique need. Our specialty fans come in a variety of sizes and strengths, to ensure every space has the comfort and beauty it deserves. From low profile ceiling fans to smaller blade fans and commercial fans, whatever your need, you'll be blown away.

REVIEWS

25" Kichler Cavelli Ceiling Fan

"I absolutely love this new take on a ceiling fan...Installation took about an hour with easy to read instructions. The fixture itself is average size with the fan in the center being smaller than most ceiling fans. I was quite surprised at the amount of air this fan moves! I would definitely recommend this fan/light to anyone who is tired of the same old ceiling fans and wants a fixture that everyone will comment on!"

REVIEWS

15" Kichler Terna™ Ceiling Fan

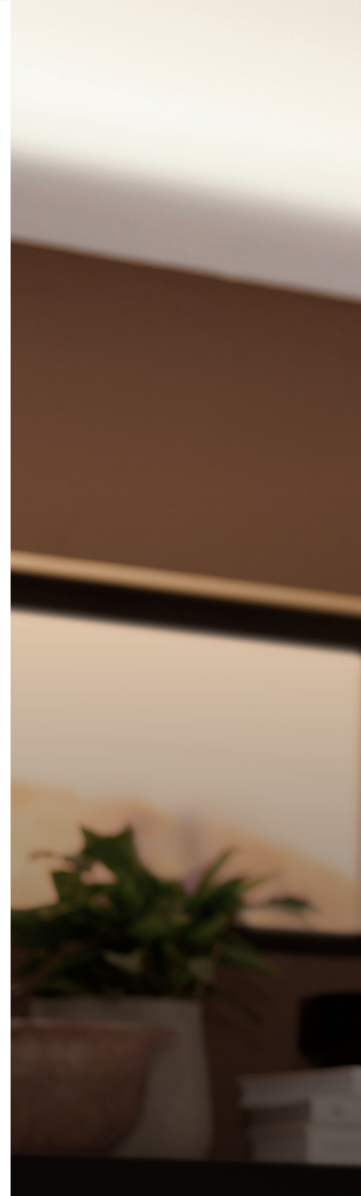

"...These fans are beautiful, absolutely mesmerizing to watch in motion, and make it easy to get air movement in potentially tight spaces. Really ideal fans for over countertops and in kitchens, as they circulate good air without causing too much of a downward draft, so papers and other items on your surfaces are less likely to go flying. The compact size makes it possible to install one of these fans just about anywhere you could imagine, and they run oh so quietly..."

- VintageFansandMore

Terna's contoured blade design produces a unique outward airflow pattern to cool a wider area.

Ceiling Fan Collections

Grand in scale or small in stature. Inside living or outdoor entertaining. Our extensive collections leave no detail to chance, with unique designs that not only look beautiful but move air efficiently and effectively.

REVIEWS

56" Kichler Brahm™ Ceiling Fan

"...The large blades are sufficient for the large room, and at any of the three speeds, it is absolutely whisper-quiet. The remote works great, and the kit includes a simple mounting bracket (for the remote) that can attach right to the wall beside (or in place of) a light switch, which means no more losing the remote!"

REVIEWS

56" Kichler Crescent Ceiling Fan

"I searched off and on for a couple years for a fan that resembled a replacement for the previous one in the office.

I happened to come across this one and I am glad I purchased it. It was installed today and it is absolutely beautiful. It looks like a piece of art..."

REVIEWS

85" Kichler Gentry XL Ceiling Fan

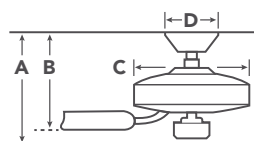

"This fan was easy to install even on our 12' ceiling. The wall control has many options for both the fan and the light and is easily operational. The color is also great and we're very happy with the quality."

- lynne D.

REVIEWS

60" Kichler Gentry Ceiling Fan

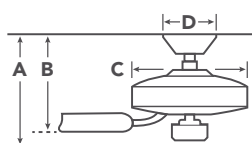

"Let me start by saying this fan is amazing! The blades are 60" and comes with 9 blades...I can tell it's going to last years to come. Very well made as well which is a plus for me. It has reversible fan blades!.."

REVIEWS

75" Kichler Breda Ceiling Fan

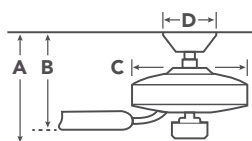

"Love this fan, Kichler quality and easy install. Not sure if there is a need for the higher speeds on this fan, low seems to move more than enough air to keep our 15x24 ft room cool even on the hottest days..."

- Vinetime

REVIEWS

48" Kichler Volos Ceiling Fan

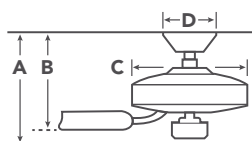

"...The installation was very easy for my husband and it did not take him very long. I love the white color of this fan. It goes very well with the darker colors in my room. This fan is very stylish and also comes with wall controls."

- kwill

REVIEWS

54" Kichler Ample Ceiling Fan

"This fan is a beauty! It fits nicely in the far end of our kitchen. It provides great circulation and looks classy. It was installed by my husband with ease...I highly recommend."

REVIEWS

34" Kichler Sola Ceiling Fan

"This little fan gets the job done. We added it to a small bedroom (8' x 14') and office (6' x 12')...The blades have a steep angle and move a surprising amount of air for such a small fan. It was an upgrade."

- Mark R

REVIEWS

54" Kichler True Ceiling Fan

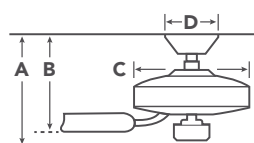

"I used this fan in my study since I liked the three blade look. Much like the other Kichler products I have used the quality was excellent installation was easy and it looks very nice. I like the fact it is pretty quiet and moves the air very well."

- Tom C.

REVIEWS

54" Kichler Spyn Lite Ceiling Fan

"Wow! This fan is absolutely beautiful. It is a brushed nickel with black fan blades. It is so stylish. It was really super easy to hang. The instructions are spot on...After installing there is absolutely no wobbling of the fan whatsoever even on high speed. We love this high quality ceiling fan."

54" Kichler Fit Ceiling Fan

"I am very happy with this ceiling fan. It keeps the room nice and cool...I like that it has 6 speeds. I also like that I can choose between a brighter white or warmer yellow light. It's quiet which is a huge plus..."

- Jen1976

REVIEWS

60" Kichler Lyndon™ Patio Ceiling Fan

"This is an amazing ceiling fan. It was very easy to install and works great. I love that I don't have to worry about it getting wet and breaking during a bad storm since its meant for outdoor use however, you're able to use it indoors also."

- Melissa M Florida

REVIEWS

52" Kichler Renew™ Premier Ceiling Fan

"I love the look and design of this ceiling fan. I chose the satin black and it looks very stylish in our home office. The fan was easy to assemble and install. It was packaged nicely and it arrived in great condition. My husband was able to install it by himself fairly quickly. It really adds the finishing touches on the room."

REVIEWS

52" Kichler Renew™ Ceiling Fan

First, I have to point out that Kichler does a phenomenal job at packaging their products. Every piece is carefully wrapped to ensure the figure is ready for assembly and use. That said, what I love about this fan is the versatility. ...The fan itself is powerful, and does well to circulate the space we have it in (master bedroom). We love it!"

REVIEWS

52" Kichler Renew™ Patio Ceiling Fan

"...The fan was easy to install after our electrician friend installed the power box for us. The fan is snug to the ceiling so the fan does not look like it is out of place on the patio. The fan has good air circulation and when it is running it is smooth and quiet. The fan came extremely well packaged with good instructions."

Accessories

Want to enhance your ceiling fan? Simple tweaks can make a big impact. To help, we offer a variety of ceiling fan accessories such as wall and remote controls, light kits, blades, and shades to help change the look of your ceiling fan.

Understanding Fan Compatible Controls

Our ceiling fans come with a control so you can easily change the ceiling fan's speed. Some of our fan control options are equipped with a dimmer and allow you to change the direction of the fan rotation. Even though your ceiling fan comes with a control, there might be times when you would prefer a handheld remote over a wall control or vice versa.

Why Switch Your Control?

Upgrade from a pull chain to a limited function fan control system.

Preference of having a wall control over a handheld remote or vice versa.

Upgrade the control system to 65K frequency to avoid interference.

Varying Controls

TYPE 1

Determine Your Fan's Motor Type

AC AC Motor

- AC motor fans are widely used in residential and multi-use applications for easy installation, control pairing, and maintenance.
- 3 speeds, forward and reverse, provide desired comfort.
- Compatible with optional wall or handheld controls with up to 65,000 codes to prevent interference.
- Installs on the same circuit to save time and materials.
- Coordinates with optional accessories like light and sloped kits.

DC DC Motor

- DC motor fans are lightweight, quieter, and use an internal transformer to convert AC to DC, enhancing energy efficiency.
- 6 speeds, forward and reverse, provide desired comfort.
- Lightweight motor simplifies installation.
- Saves energy costs as DC motors use up to 70% less energy.
- Includes a remote for convenient fan control.

TYPE 2

Ceiling Fan Control Types

Pull Chain

Wall Control

Handheld Remote

A pull chain is the only option that cannot control the fan remotely.

TYPE 3

Fan Control Functionality Types

Manual Function

Manual reverse switch

Limited Function

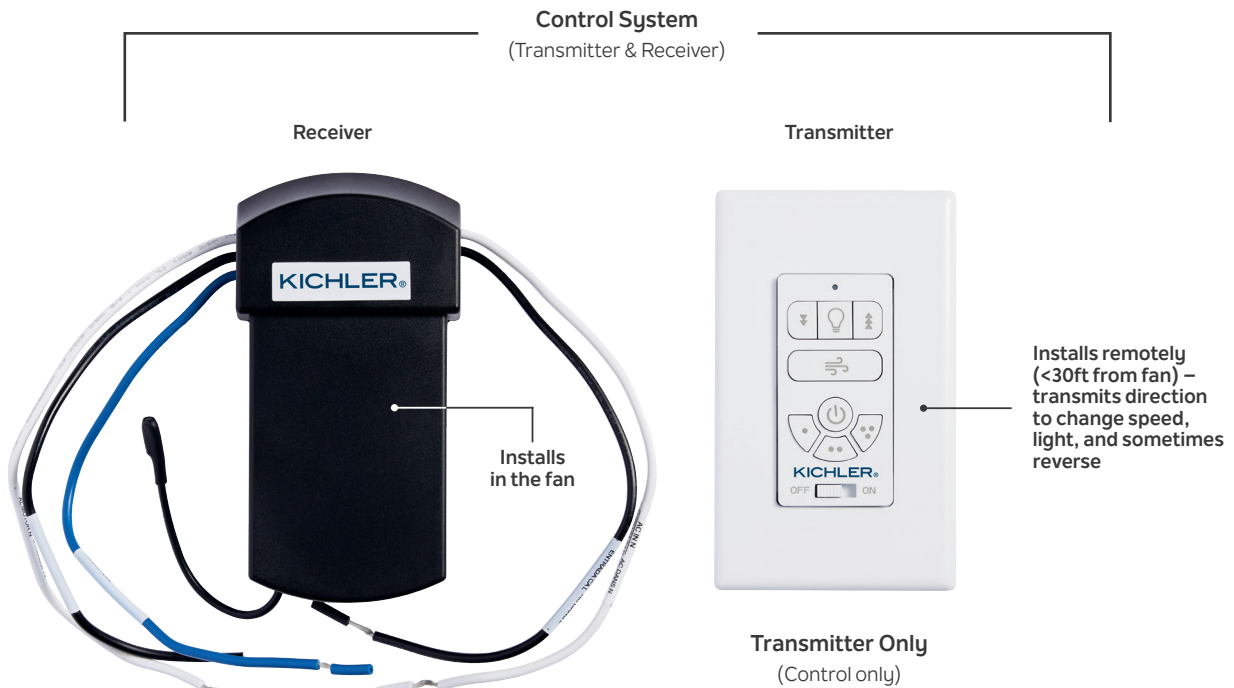

Includes reverse switch

Full Function

The fan's initial control functionality needs to align with any optional controls you wish to select.

Control System vs. Transmitter Only

If your fan comes with a wall or handheld remote, then it comes equipped with the full system.

What to look for in your fan's current control to narrow down your accessory selection

Fan Frequency Codes

Frequency in fan remotes indicates the number of codes it allows to uniquely pair the remote to the fan receiver. The greater the number of frequencies, the lower the likelihood of interference with other remotely controlled products. Control frequencies must align when selecting an alternate transmitter, otherwise you will need a full control system to upgrade frequencies.

Pull Chain

A pull chain offers manual control of the fan. To control remotely, you would need to select a full system with both a receiver and a transmitter.

Transmitter Only

When a fan comes with a system, you only need a comparable transmitter when switching to a new control.

QUICK TIPS

1. A pull chain fan can be controlled remotely by upgrading to a Limited Function control system.
2. When looking for a compatible control to your existing system, match:
 - AC to AC or DC to DC
 - Limited to Limited Function or Full to Full Function
 - 16 to 16 frequency or 65,000 to 65,000 frequency
3. If you want more from your control, an upgrade would likely require a full system (receiver + transmitter).
4. To avoid interference within hotels and apartment buildings, we recommend fan controls with 65K frequencies. This avoids the risk of impacting other remote appliances, such as a garage door or other ceiling fans within the vicinity.
5. If you want to upgrade from 16 frequencies to 65,000 frequencies, you need to purchase the full 65K control system (receiver + transmitter).

AC Ceiling Fan Handheld Remote Controls

Hardwired AC Wall Controls

Designed for use with most AC motor fans.

Dual-Slide Control Fan & Light

337010WH

- **Max 1.25 Amp**
- Fan speed and light control.
- Full-range dimming. Not compatible with LED light sources.
- Dry-rated for indoor use only.
- Includes wall switch and cover plate, plus mounting hardware. Requires 3 wire + ground installation.

4-Speed Rotary Wall Control 370040 (Brushed Aluminum)

- **Max 10 Amp**
- Controls multiple fans on one circuit.
- Dry-rated for indoor use only.
- Brushed aluminum faceplate with black control knob.

4-Speed Slide Control Fan only

337012 IV, WH (shown)

- **Max 1.25 Amp**
- 4-Speed fan control. Controls 1 fan only.
- Dry-rated for indoor use only.
- Includes wall switch and cover plate, plus mounting hardware.
- Can be used in a dual gang box alongside our Dimmer Slide Control 337011WH

Dimmer Slide Control Light only

337011WH

- **Max 600W**
- Full-range dimming. Not compatible with LED light sources.
- Controls 1 light fixture or 1 fan light only.
- Dry-rated for indoor use only.
- Includes wall switch and cover plate, plus mounting hardware.
- Can be used in a dual gang box alongside our 4-Speed Slide Control 337012.

DC Control Transmitter - Full Function

Designed for DC motor fans only. **Dry-rated transmitter.**

6-Speed DC CoolTouch™ Transmitter Full Function

371075WHTR

- **65K frequency options**
- 6 forward speeds, reverse, and motor off.
- Lights on/off with full-range dimming (including LED light sources).
- Includes white faceplate and mounting hardware.
- No more than 2 fans on one circuit.

Optional Accessories:

370010IV CoolTouch wallplate in ivory (IV)

370011IV, WH CoolTouch dual gang wallplate in ivory (IV) or white (WH)

6-Speed DC Wall Transmitter Full Function

370036 IVTR, WHTR (shown)

- **65K frequency options**
- 6 forward speeds, reverse, and motor off.
- Lights on/off with full-range dimming (including LED light sources).
- Includes ivory or white faceplate and mounting hardware.
- No more than 2 fans on one circuit.
- Hardwire control, no batteries needed.

DC CoolTouch™ Accessories

370010IV Single Gang CoolTouch™ Wallplate

Works with any AC or DC CoolTouch™ Control System

370011 IV, WH (shown) Dual Gang CoolTouch™ Wallplate

Symbol Guide & Notes

Notes

- Wattages stated are the maximum recommended; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S.A. and Canada except where noted.
- All products featured in the outdoor section are certified and listed to UL/CSA/ETL standards for wet location except where noted.
- On some products, in order to accommodate higher-than-normal ceiling height, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants, and other forms of weathering.
- To serve you better, Kichler Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.
- Champagne Bronze™ is a trademark of Delta Faucet.

Consumer Notice

Reese's Law was enacted in October of 2023 with the purpose of reducing the risk of injury from ingestion of button cell or coin batteries by children six years old and younger. Consumer Products using button cell or coin batteries are required to meet their corresponding test standards and shall carry all required markings moving forward. Kichler Lighting is committed to ensuring our products, packaging, and instruction sheets meet these requirements.

For additional information regarding this regulation, please visit:

<https://www.ecfr.gov/current/title-16/chapter-II/subchapter-B/part-1263>

Federal Legislation to phase out 100 watt incandescent bulbs started January 2012.

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310-2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100 watt bulbs in January 2012 and will end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps and plant lights.

In 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as compact fluorescent lamps (CFLs) and LED lamps.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor lantern products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite™ fixtures.

Kichler is a member of the American Lighting Association (ALA), a trade association representing the residential lighting and ceiling fan industries in the United States and Canada. Its membership includes leading lighting and fan manufacturers, showrooms (retailers), manufacturers representatives and designers. ALA members are dedicated to providing the public with the proper application of quality residential lighting.
