INFINITY

AN INNOVATIVE CONCEPT

BORN FROM A DESIRE TO DELVE DEEPER INTO THE CREATIVE
POSSIBILITIES OF ALABASTER LUMINAIRES, INFINITY IS THE
PREDECESSOR TO OUR WORKSHOP’S NEWEST LINE.

A CREATIVE CONCEPT WITH A RICH VOCABULARY OF SHAPES :

THE INFINITY SCULPTURAL COLLECTION

THE INFINITY DESIGN COLLECTION

INFINITY

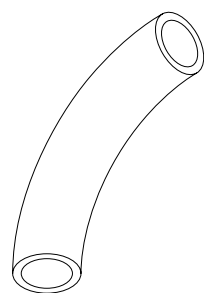

THE EMERGENCE OF A MOVEMENT

LIGHTING ELEMENTS

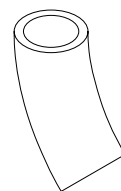

INFINITY elicits a new creative verve through its rich vocabulary of shapes blending straight cylindrical forms and halves and eighths of circles. With vibrant, floating contours, INFINITY unites curved and linear elements to inspire infinite combinations.

A TEAM OF SPECIALISTS WITH A UNIQUE KNOW-HOW DEVOTED TO ALABASTER

With more than a 1 000 projects completed since 2005, the design office has developed its own style and tools to produce creations that surpass boundaries. INFINITY is the latest manifestation of the team's performance.

A COLLABORATIVE COLLECTION

The INFINITY collection is an opportunity for designers to collaborate with our workshop to create unique pieces from this innovative vocabulary of shapes. From an original idea to handcrafted realization, INFINITY is the perfect expression of the union between alabaster and the finest contemporary design.

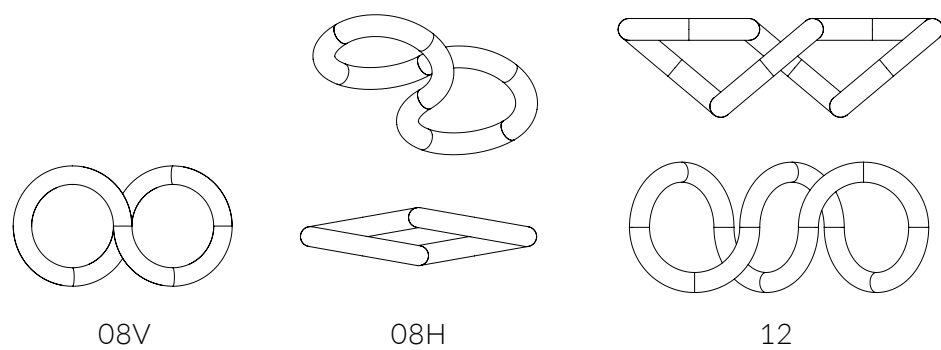

INFINITY

SCULPTURAL

The initial pieces in this series are pendant lights. With no start or finish, they unfold into the surrounding space offering graceful contours and striking volumes structured by a strict symmetry.

An ode to mathematical poetry.

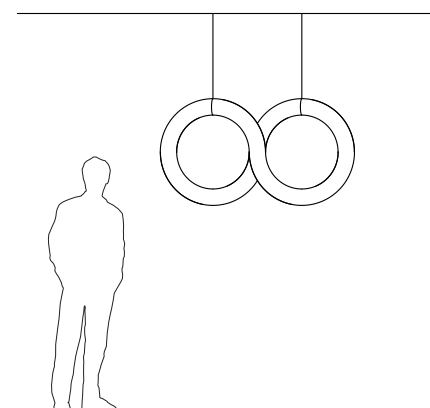

In May 2019, INFINITY 08 V won first prize at the New York Design Awards in the architectural lighting design category.

INFINITY 08V

Suspended by two leather ropes, INFINITY 08V displays a perfectly symmetrical mathematical symbol representing the concept of infinity. Placed along a wall, this vertical suspension acquires meaning. It also enhances large spaces with high ceilings.

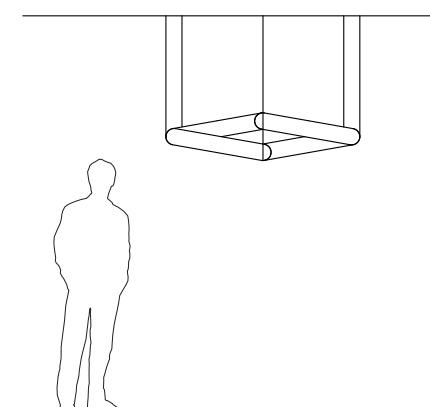

INFINITY 08H

Designed with eight quarter circles, the INFINITY 08H chandelier features a generous volume sculpted into the symbol of infinity. Suspended by three slender, leather ropes, INFINITY 08H is truly magnetic.

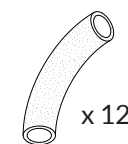

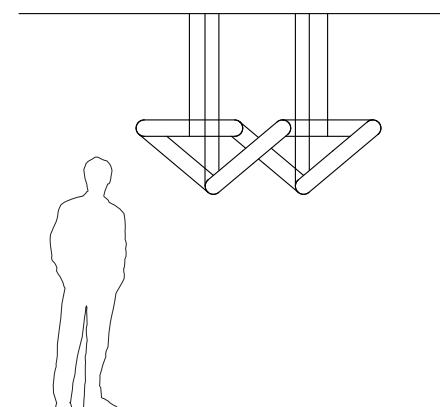

INFINITY 12

The INFINITY 12 composition features a double loop that gives this chandelier a stately and exceptionally structured, symmetrical aspect. INFINITY 12 is impressive, intriguing the beholder with the multiple perspectives it offers.

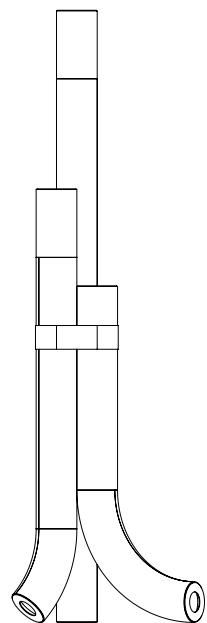

INFINITY

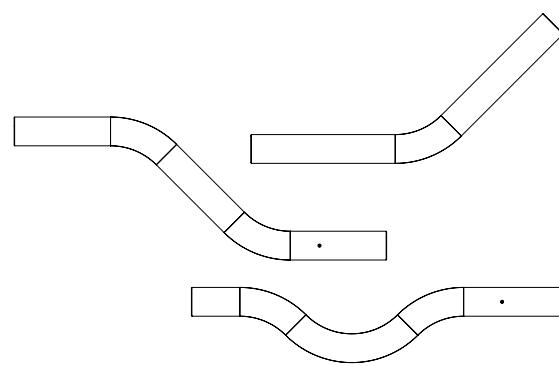

DESIGN

Developed in Atelier Alain Ellouz' design office, this latest creative prowess brings us a collection of lighting elements comprised of flirtatious, powerful and innovative elements, a clear expression of sophisticated design.

With this collection, Atelier Alain Ellouz takes another step forward into the contemporary design world.

FANTASY

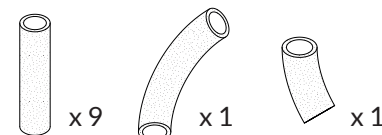

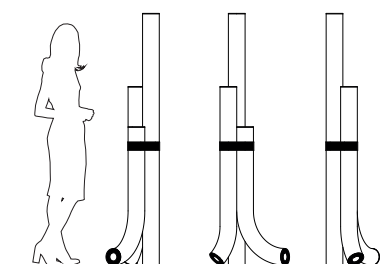

LIBERTY

FANTASY

As Atelier Alain Ellouz' initial floor lamp, FANTASY is solidly installed on three linear alabaster pieces held at the center by a metal ring. Stretching elegantly towards the sky, FANTASY projects direct light from its extremities. It's simple, resolutely contemporary design makes it a central piece in the INFINITY Design collection.

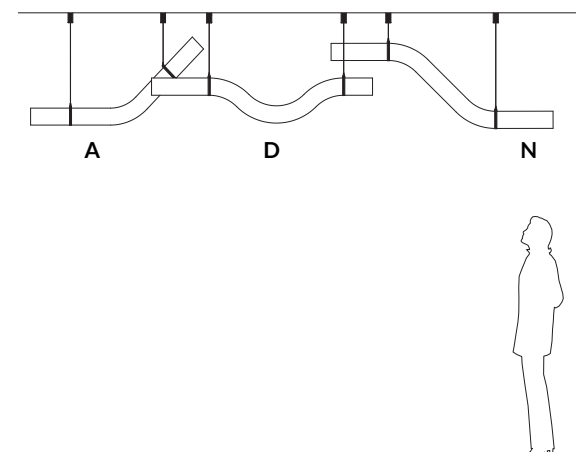

LIBERTY

LIBERTY offers three lighting designs in various shapes and sizes: LIBERTY A, LIBERTY D and LIBERTY N. LIBERTY can be centered and height-adjusted to suit to the room's space, giving you the freedom to suspend them in your own design. Its structured and harmonious form offers variation in the dialog created between the space and light. A gentle light diffuses from inside LIBERTY to reveal all the patterns and shades of alabaster. Leather-covered ropes suspend the elements and underline their warm tones. You can assemble LIBERTY and compose floating sculptures. Combine the three elements in the line for striking or monumental sculptural lighting design. Resolutely unique!
