Alabaster Lighting

ATELIER ALAIN ELLOUZ
PARIS

Acquiring one of Atelier
Alain Ellouz' pieces gives
access to one of earth's
mysteries.

Alain Ellouz

.édition

WITH ITS CLEAN STYLE,
THE COLLECTION OF UNIQUE
AND EASY-TO-INSTALL
ALABASTER LIGHTING
ELEMENTS REFLECTS THE
SPIRIT OF THE ATELIER ALAIN
ELLOUZ BRAND

Alabaster is central to the designs from Atelier Alain Ellouz,
where artisans sculpt the stone to reveal its vibrant richness.

Atelier Alain Ellouz never loses sight of its standards of
excellence and its quest for sleek design. The workshop
combines these objectives with a unique know-how to unveil
the hidden treasures of alabaster by creating exceptionally
bold pieces, often valued as works of art.

With the **.édition** collection, Atelier Alain Ellouz seeks to
open its refined, imaginative design to a wider audience.

This collection includes table lamps, pendant lights and wall
lighting that offer quintessential Atelier Alain Ellouz style.

Our alabaster luminaires are designed with elegant forms
and supported by sleek structures in an expression of shape
and light. The precise and controlled lighting system brings
alabaster to life in contrasts of light and shadow to create a
remarkably magnetic appeal.

ECO-DESIGN

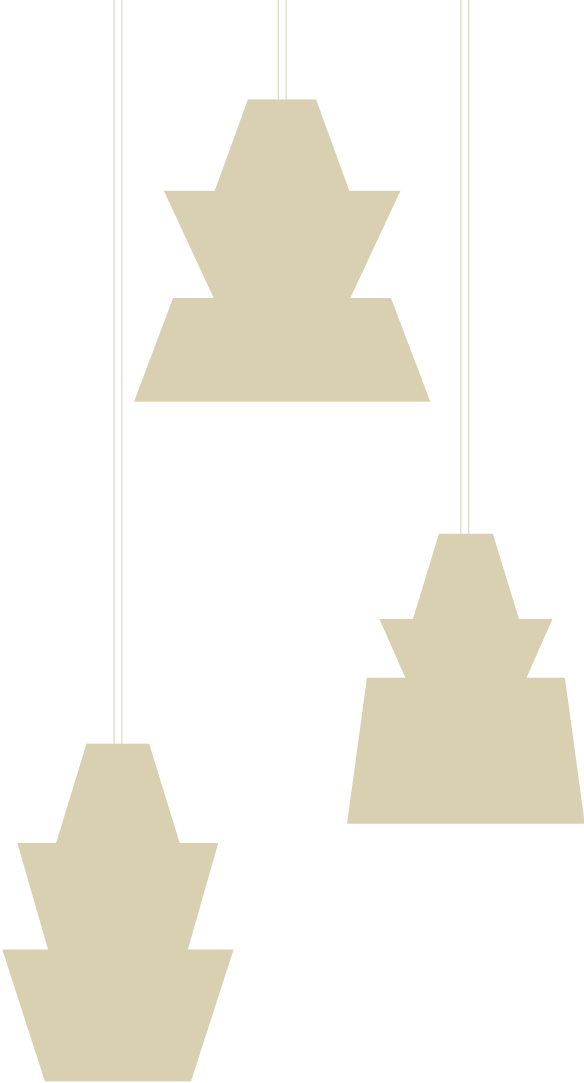

In keeping with the ethics of eco-design, this collection
makes use of the smallest alabaster stones extracted at the
same time as the larger blocks. Nothing is lost, we recover
every piece... Atelier Alain Ellouz takes this once squandered
treasure from the earth and transforms it into a work of art.

FAMILIES

.édition embraces the new concept of families, a collection
of different types and formats of lighting elements all based
on a similar style. Their common material and design confer
coherence and unity to a project.

PENDANT LIGHTS

.édition pendant lights are elegant, contemporary, and defy the laws of gravity. Small or large, installed alone or in a composition, these pieces give the alabaster stone a weightlessness thanks to their well-balanced and harmonious floating shapes. **.édition** pendant lights are inspired by Japanese art and organic forms. They share simple alabaster design and subtle geometrical contours. As direct light or as a more diffused radiance, they adapt to any room thanks to their easy installation.

ALIX

.édition

Resolute, ALIX amplifies the stone's qualities. Clean, geometrical lines contrast alabaster's irregular, delicate patterns. ALIX' soft radiance sets the mood, while its narrow rim concentrates the diffused light. Hang ALIX pendant lights at staggered heights for a graphic composition in your living room or library, for example.

PENDANT LIGHT

ALIX 24 has the same sleek lines as its little sisters ALIX 14 and 17. The size variation gives it a more assertive presence. Its suspension system hung by a transparent rope and cable is unique. The three sizes of ALIX can be combined together to form a dynamic composition. In this case, ALIX 14 and 17 will be fixed in height on a rope to respect the harmony of the set.

TABLE LAMPS

Your consoles or bedside tables have found an ideal companion to highlight them in a theatrical way. The simplicity of their shape combined with the power of alabaster make them genuine collector's pieces. Alabaster stone diffuses a delicate and lively light, inviting to contemplate this creation.

GAMA L26

.édition

Iconic GAMA reinterprets the table lamp in contemporary fashion, in a play of curves and sleek lines. As for a classic lamp, Iconic GAMA consists of a base and a lampshade, separated by a delicate golden brass trim. The edges are fine and precise; the perfect proportions. The illuminated upper body magnifies the essential beauty of alabaster, providing a timeless elegance to this creation. GAMA is also available in a taller version and as a nomadic lamp.

NOMADIC LAMPS

Available in cylindrical, spherical, conical and ellipsoidal shapes, **.édition** nomadic lamps associate simple shapes borrowed from geometrical lines. These lamps feature an innovative technology to offer eight hours of use at a time. Light reveals alabaster's energy and enhances these hand-crafted, sleek compositions. The result is captivating! Resolutely elegant and luxuriously simple, **.édition** nomadic lamps provide presence throughout the day. Alone, or in a composition, they can create an intimate ambiance as a table centerpiece, dim the light in an office or library space or usher in the last rays of sunlight when set at the edge of a patio.

ATHENA

.édition

A sphere delicately sits atop a cylinder in absolute harmony. ATHENA evokes the Earth's orbit around the sun. Alabaster's translucence diffuses a soothing light that reveals its characteristic patterns. Those seemingly fluid motions in the stone are reminiscent of ocean currents. ATHENA is an invitation to travel the world, a peaceful voyage from the comfort of your sofa.

FAMILIES

COHERENCE AND UNITY IN MATERIAL AND DESIGN

Families are sets of varying types and formats of lighting elements that share a likeness in style. You can coordinate and compose them in a dynamic, harmonious expression.

This concept of families was inaugurated with the trio Divines, pendant lights based on a common profile designed in varying sizes. With its nomadic table lamps, wall lighting and pendant lights, the Iconic set offers all the variations of the same theme.

DIVINES

With their evocative names, CAMILLE, CELINE and COLETTE embody feminine curves. The Divines are voluptuous pendant lights. Sharing the simplicity of alabaster stone and the subtlety of their geometric profile, only their proportions vary. Their direct radiance is combined with the magic of alabaster stone's diffused light. As a composition, they sublimate interiors such as a dining room table or a restaurant room with elegance and delicacy.

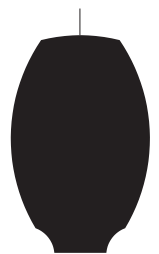

CAMILLE

CELINE

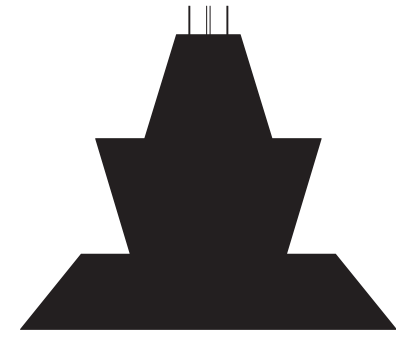

COLETTE

ICONIC

Iconic pays homage to contemporary architecture as it adopts all its codes. This family of alabaster light fixtures is a construction game based on a simple, unconventional shape, the conical alabaster trunk. As a coherent family with similar lines, Iconic has four distinct designs: LAB, FLO, PLI and GAMA. Each of these designs comes in different types of light fixtures with various formats.

ATELIER ALAIN ELLOUZ

PARIS

ALABASTER & ROCK CRYSTAL WORKSHOP

Stone and light. Two extremes in unison.
Atelier Alain Ellouz luminaires are uniquely poetic. Fascinating pieces transcended by light reveal the extraordinary hidden richness of alabaster. In a remarkable ode to nature, space and time, they inspire contemplation and enhance any interior.

ALABASTER

Every Atelier Alain Ellouz **.édition** luminaire is made from naturally translucent alabaster stone. Blocks are extracted from quarries, then carefully selected, sculpted, sanded and fitted with an internal light. The stone develops warm, white nuances that cloak a room in an inviting light.

Used early on to create window panes, sculptures or decorative elements, alabaster has always been a symbol of tranquility. By introducing this stone into contemporary design, Atelier Alain Ellouz shares its boundless variations and intimate qualities.

Crafted from natural material, each of our luminaires is unique. We invite you to contemplate their beauty.

ATELIER ALAIN ELLOUZ SIGNATURE

“Today’s
contemporary
pieces will be
sought after
by tomorrow’s
collectors.”

Alain Ellouz

Your **.édition** lamp was hand-crafted in our workshops with the same standards of excellence and pure tradition as leading French luxury brands. Each lamp is made using small, white, alabaster stone blocks carefully selected by our stone craftsmen. That’s why each one of our lamps is unique, with its own patterns and transparency.

Every one of our designs carries the Atelier Alain Ellouz signature logo and classic style. A timeless design based on pure lines in an expression of sleek elegance. A unique style of alabaster stonecraft, recognizable anywhere in the world.

Once you have acquired an Atelier Alain Ellouz piece, you can register your luminaire and receive an authenticity certificate.

ATELIER ALAIN ELLOUZ

"Gemme" - exclusive creation for the Chaumet boutiques

INFINITY 08 V, icon of the INFINITY SCULPTURAL collection

As a true artisan of stone, Alain Ellouz masters its qualities and builds on its flaws to transform what seems ordinary into a jewel. In 2005, he began his quest to reveal the hidden treasure of each unique stone. Since then, he has been the inspiration and impetus behind the workshop's creations.

Atelier Alain Ellouz opts for radical design, out of both conviction and respect for natural materials. Alabaster and rock crystal are living stones whose intrinsic purity naturally brings them to life. In keeping with the stones' character, the workshop bases their designs on pure lines and simple forms that capture just the essential. For designers, it comes down to showcasing the stone and using sleek structures to compose new models in an ongoing commitment to expression through shape and light.

These exceptional creations are all hand-crafted, and designed with the same standards of excellence and pure tradition upheld by French luxury brands. Alain Ellouz is the first to develop this new stone craft. This innovative new art form involves the meticulous skill of sculptors and finestone craftsmen as well as the cutting-edge technologies developed to control light and preserve the qualities of alabaster. A rigorous selection of each stone, high-precision skill, unwavering commitment and superb implementation and installation make Atelier Alain Ellouz a part of France's heritage of superior craftsmen. Collaboration, dialog, rigor and pragmatism are core values applied in achieving the most ambitious projects. Atelier Alain Ellouz reinvents itself every day. And today's contemporary pieces will be sought after by collectors tomorrow.

In-workshop assembly of LYRA lamps.

INFINITY collection designs.

New York showroom - 250 m² in the heart of SOHO, Manhattan

Situated in Buc, in the French department near Versailles, Atelier Alain Ellouz is a workshop of 35 collaborators. Designers are led by Marion Biais-Sauvêtre, the true inspiration behind new pieces. Alexis Jouvin heads the design office where he continues to innovate technical solutions. Project managers orchestrate ambitious projects. Sculptors explore sculptural forms and unique textures to create dialog between shape and light.

Finestone craftsmen then work the stone in the tradition of wood cabinet-makers - layouts, cuts, assemblies, inlays, etc. Lastly, fitters defy the laws of gravity, assembling seamless compositions. Around the globe, they ensure the quality, safety and durability of the workshop's pieces. As a result of one success after another, our modest workshop is now burgeoning. In 2014, a showroom opened in London, followed by another in New York in 2018.

Atelier Alain Ellouz has brought alabaster stone to the forefront of luxury interior architecture. It designs bespoke projects such as exceptional luminaires, unique bar and mural back-lit compositions and luxury furnishings. These works of art decorate some of the most beautiful spaces in private homes, hotels, restaurants, luxury offices and retail stores around the world. Atelier Alain Ellouz boasts some very prestigious references, including royal palaces, luxury boutiques, and prominent hotels and restaurants. It also collaborates with globally-acclaimed designers.

.édition symbolizes a fresh momentum for the workshop as it seeks to offer private customers access to its elegant design through a new collection of luminaires, emblems of Atelier Alain Ellouz DNA. Handcrafted and always unique, each piece is easy to install and use. They are designed using a timeless material sculpted into contemporary shapes to reflect the style of the Atelier Alain Ellouz brand.
